

Alberta Quantum and Nano-Optics 2009 Annual Meeting

University of Calgary, Alberta
June 24-27, 2009

Description:

The event is **free and open to the public**, and will feature a two-day schedule of student talks and guest speakers, with a social outing on the third day. In a workshop format, the focus of the talks will be on imparting practical skills and discussing capabilities, not necessarily highlighting the most recent research

results. The aim will be on teaching both theoretical and experimental technical tools by graduate students to graduate students, skills that could be directly applied to day-to-day research. We will also have tours of our state-of-the-art Institute for Quantum Information Science (IQIS) research laboratories that will aim to highlight our institutional capabilities and opportunities for collaboration.

Travel and Accommodation Subsidies Available!!!

Deadlines:

Wed. April 22 - Last day to book guaranteed room (see website)

Wed. June 3 - Last day to register for presentation and/or outing (Outing fee for non-presenters - \$20 - please contact organizers)

Fri. June 19 - Last day to register/submit talk outline

Are you interested in laser, atomic, molecular and optical science?

Do you want to learn practical skills and the capabilities of quantum and nano-optics?

Featuring:

Talks by leading student researchers in the fields of atomic, molecular and optical physics and engineering.

Tours of the new state-of-the-art quantum optics research laboratories

Sponsored professional and social opportunities to network (including fun rafting day trip!)

Organized by:

Connor Kupchak
Chris Healey
Andrew Macrae
